

Indian Lake Local Schools
1:1 Responsible Use Agreement

1:1 Mission Statement

A 1:1 technology program refers to the ratio of students per device. Therefore, in a 1:1 program, each student and staff member have access to their own device. Please note this does not mean all students will have access to take their device home. Only grades 5-12 have the option to take their device off campus. Devices in grades K-4 will remain on campus. This device may be a Chromebook, laptop, or tablet. Having a digital device in the hands of all students gives students access to highly engaging, interactive, and transformational learning. Through the effective use of these digital devices, students will participate in more 21st Century geared classroom interactions and learning opportunities which are even more personalized, individualized, and differentiated. As students interact with the content, they will be in the role of producers, evaluators, and interpreters of knowledge as teachers facilitate their students' collaboration and engage in authentic learning tasks. The enclosed guidelines and procedures are subject to periodic updates and revisions.

District Owned/Issued Chromebooks

- Chromebooks will be distributed at the beginning of each school year for grades 5-12. The device will be assigned to your student for the school year. Devices in grades K-4 will be kept by the classroom teacher.
- Parents/Guardians and students MUST sign BOTH this **Indian Lake Local School District 1:1 Responsible Use Agreement** and [the Student Technology Acceptable Use and Safety Policy](#), completed with initial fall online forms, before the Chromebook can be issued to any student. There will be no exceptions to this rule.
- Chromebooks will be collected at the end of each school year. In most cases, the same device assigned to your student will be returned to him/her at the start of the next year depending on the rotation of devices in grade levels.

Acceptable Use

- Access to Indian Lake Local Schools technology is a privilege, not a right. Each student and parent will be required to follow the guidelines in this policy and outlined in the [Student Network and Internet Acceptable Use and Safety Policy](#) as well as all other school policies.
- Transmission of any material that is in violation of any federal or state law is prohibited. This includes, but not limited to the following: confidential information, copyrighted material, threatening or obscene material, and malicious software.
